LATHESHA N

Software Engineer

8310426364 ◇ latheshaan@gmail.com ◇ India

SUMMARY

MCA graduate with a strong foundation in Python, Java, OOP, Data Structures and Algorithms, Linux, and software development. Hands-on experience through academic projects and a Data Science internship, with knowledge of debugging, problem-solving, and software testing using Postman. Interested in embedded and automotive software development, with a strong willingness to learn C++, embedded systems, communication protocols, and software integration and testing.

EDUCATIONALQUALIFICATIONS

- **MASTER OF COMPUTER APPLICATIONS**, Dayananda Sagar Academy of Technology and Management (GPA: 8.56 CGPA) '26
- **BACHELOR OF COMPUTER APPLICATIONS**, Sri Bhuvanendra College (GPA:8.6CGPA) '24
- **PUC**, A R S PU College(GPA:78.50%) '21
- **SSLC**, Sri Sachchidananda Saraswathi English Medium High School (GPA:80.80%) '19

TECHNICALCOMPETENCIES

- **Programming Languages:** Python, Java, JavaScript, C++
- **Frameworks/Libraries:** HTML, CSS, Node.js, Pandas, NumPy, Matplotlib
- **Core Concepts:** OOP, Data Structures & Algorithms, Software Testing, Debugging
- **Databases:** MySQL, MongoDB
- **Cloud Platforms:** AWS
- **Tools:** Power BI, Tableau, Postman, Git, GitHub
- **Operating Systems:** Windows, Linux
- **Software Development/Testing:** Debugging, API Testing, Postman, Software Integration

INTERNSHIP

Junior Software Development Intern Feb'26—May'26
Edutainer Bengaluru, India

- During my Software Development Internship at Edutainer (PAT Technologies Private Limited), I worked on practical software development projects and gained hands-on experience in modern web technologies.
- I contributed to the development of Vibe Checker–Smart Emotion and Compatibility Detection System, an AI-powered application with features such as Aura Scanner, AI Response Generator, and Vibe Clash.
- Through this internship, I strengthened my skills in web development, AI integration, problem-solving, and building user-focused applications while gaining practical exposure to the software development process.

Data Science Virtual Intern Sep'23—Nov'23
ICT Academy Remote, India

- Used Python for data analysis and basic machine learning model development.
- Worked with Pandas, NumPy, and Matplotlib for data processing and visualization.
- Built basic machine learning models for prediction tasks.
- Gained practical experience in data analysis, problem solving, and model development.

PROJECTS

Memory Matching Game
Tech Stack: Node.js, JavaScript, HTML, CSS

- Developed core game logic, including card shuffling, matching mechanism, scoring, and win detection.
- Designedaresponsiveuserinterfacewithsmoothanimationsforenhanceduserexperience.
- Implementedserver-sideroutingandstaticfilehandlingusingNode.js

CERTIFICATIONS

- **Artificial Intelligence Fundamentals**, IBM
- **Customer Engagement Communication PersonalityDynamics**, IBM
- **Workshop on Django Web framework**
